## Blog-related widgets

### News Channel or News Slider

NOTE: The **News Channel** and the **News Slider** widgets are the same.

Displays the first part of the content of blog entries along with the first image from each, regardless wherever that image is located in the blog post. Wider sizes show hints of the next blog entry, as seen below.

RECOMMENDATION: Use square images, not rectangular (at least for the first image).

## News List

Displays blog entries from specified Communities. Can pull from multiple sources. Displays only headline and creation date. Does not show any of the body, nor photos.

[+ Create News](#) [more news](#)

## News Overview

Displays the first image and truncated copy from blog entries, with individual entries stacked vertically. Although this will grow to fit any width column, the image grows accordingly but the amount of copy remains constant. Therefore, using this widget in larger areas really doesn't make a lot of sense.

**RECOMMENDATION:** Horizontal images are preferred for this widget in the larger usages (as shown on the left below). Square or vertical for smaller applications as on the right.

[+ Create News](#) [more news](#)

## News

Displays content from the specified Communities' blogs. Can automatically scroll through blog entries or simply show as a list. Can handle multiple Communities as sources.

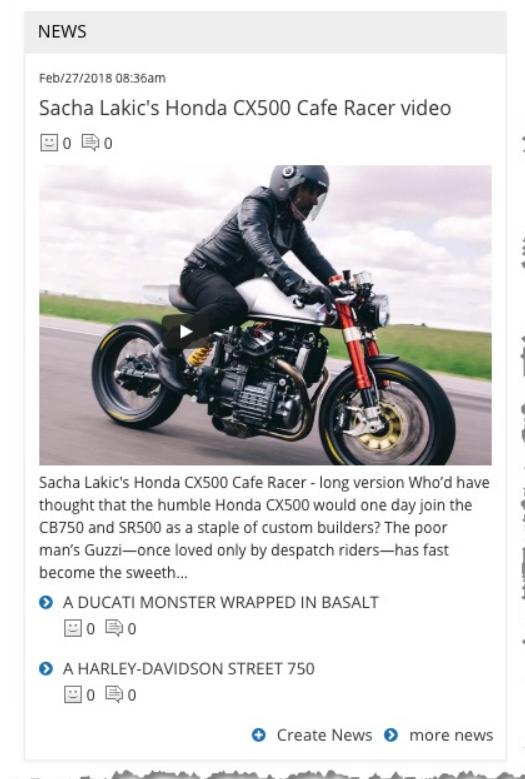

If set to "auto" height and automatic scrolling, it may change height up and down as it scrolls. To limit this, try to make the first images in all the blog entries the same proportions (height to width).

**RECOMMENDATION:** Horizontal images. Square images look fine but become quite tall.

### Scrolling

### As a list

Larger-size example shown on next page

**NOTE:** To add embedded video (such as from YouTube), the embedded video HTML will show up in the widget as actual HTML and not as the video you were hoping to have. ALSO NOTE that HTML5 <video> objects DO work in the widget. (as yet untested, but that's what's on the home page of the ICEC theHUB demo).

For standard HTML embedded videos, the workaround is to make a screenshot of the video, place it first in the blog post, then put the embedded HTML further down the page. In that case, the embedded HTML is ignored by the widget for display purposes on the ICEC page. However,

users will have to click into the doc to view it in the ICEC modal dialog (or in the Community) to actually launch the video.

## Static Content – Blog

Shows the full content of a single blog entry. Can be set to show a specific (selected) blog entry or the most recent entry.

DOES NOT display embedded content (for instance, the embedded HTML video beneath the first image shown to the right).

Also DOES NOT resize images to fit narrower columns (see below).

If the height is set to a fixed figure (as opposed to “Auto”) and the content is longer than the specified size, scroll bar will NOT be shown.

### STATIC CONTENT / BLOG

```
<iframe allowfullscreen="" frameborder="0" height="315" sandbox="allow-popups allow-same-origin allow-scripts" src="https://www.youtube.com/embed/4CwGJ4o4QIU?rel=0" width="560" sandbox="allow-popups allow-same-origin allow-scripts"></iframe>
```

### Sacha Lakic's Honda CX500 Cafe Racer - long version

Who'd have thought that the humble Honda CX500 would one day join the CB750 and SR500 as a staple of custom builders? The poor man's Guzzi—once loved only by despatch riders—has fast become the sweetheart of the [cafe racer](#) world.

The [CX500](#) works best when builders manage to straighten out its awkward lines. And who better to do that than an experienced automotive, furniture and architectural designer? Cue Sacha Lakic, who runs a studio in Luxembourg and likes to add the occasional motorcycle to his portfolio.

### Sacha Lakic's Honda CX500 Cafe Racer - long version

Who'd have thought that the humble Honda CX500 would one day join the CB750 and SR500 as a staple of custom builders? The poor man's Guzzi—once loved only by despatch riders—has fast become the sweetheart of the [cafe racer](#) world.

The [CX500](#) works best when builders manage to straighten out its awkward lines. And who better to do that than an experienced automotive, furniture and architectural designer? Cue Sacha Lakic, who runs a studio in Luxembourg and likes to add the occasional motorcycle to his portfolio.

This '82-model CX500 was found by Sacha at George's Garage—a shop owned by friends. It was standing in one corner of the garage, with an assortment of parts scattered on a shelf in another.

“I have always been a great fan of the motor of this machine,” he says, “a magnificent 80-degree V-twin, full of character.” From the onset, he decided to keep the bike’s overall design as sleek and minimalistic as possible in order to draw attention to the engine.

## Top News

Yet another way to show blog content. Pulls from one or more blogs. Shows selected entries or the most recent. Can automatically scroll. Can be personalized. Truncates content regardless of space available for it.

**RECOMMENDATION:** Square or vertical images.

## People Birthday (on-prem only)

NOTE: This only seems to work if you have entered the birthday properly in the user's Profile, which requires \*-MM-DD format (note the leading asterisk).

A screenshot of a "PEOPLE BIRTHDAY" card. It features a photo of a smiling man (Frank Adams), his name "Frank Adams" in blue text, his title "Marketing Design Expert", his email "fadams@greenwell.com", and his phone number "5551128".

If you directly edit the user **Profile**, it shows an example of the correct date formatting. However, if you use the **Preferences** widget (as shown below) or the **Profile Completion** widget, it will NOT show the correct format and will accept all kinds of formats that won't work.

A screenshot of a "PREFERENCES" card. It contains four form fields: "Title" (Chief Information Officer), "Birthday" (\*-03-14), "Building" (3), and "Floor" (4). A "Save" button is located at the bottom right.

## People Finder

Provides search capabilities for people. Optionally, inactive people can be included.

PEOPLE FINDER

PEOPLE FINDER

 Save Widget

## Preferences (on-prem only)

Allows direct editing of the current user's Profile information. In the widget setup, select the fields you wish to allow users to edit:

PREFERENCES

Widget Title	Preferences
ID / Type	Preferences / Preferences
Height	auto
Select fields to show:	<input type="checkbox"/> Title <input type="checkbox"/> Birthday <input type="checkbox"/> Closest Metro Area <input checked="" type="checkbox"/> Building <input type="checkbox"/> Floor <input type="checkbox"/> Office
<input type="button" value="Save Widget"/> ▲	

PREFERENCES

Title:	Chief Information Officer
Birthday:	3/13/1982
Building:	3
Floor:	4
<input type="button" value="Save"/>	

## Profile Completion (on-prem only)

Similar to the **Preferences** widget, in this one you select the Profile content that should be filled out for all people. The difference is, what is displayed to the user is only the missing information from his/her profile. As content is completed, it is removed from the widget.

PROFILE COMPLETION

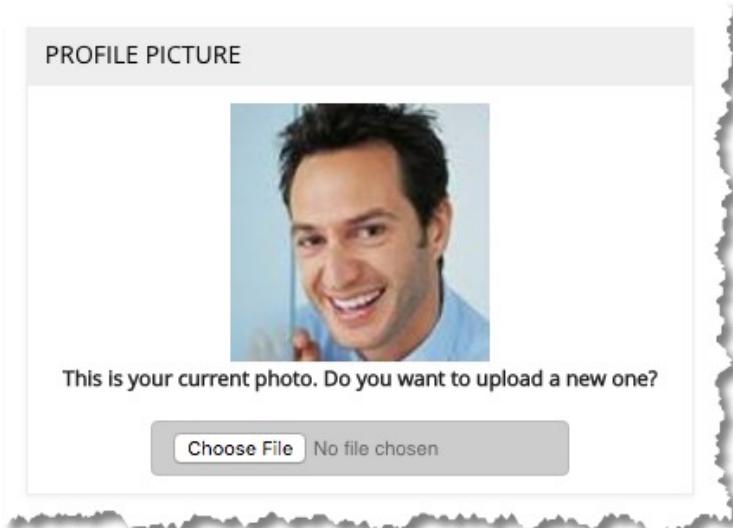

Widget Title	Profile Completion
ID / Type	ProfileCompletion / Profile Completion
Height	auto
Select fields to show:	<input type="checkbox"/> Title <input type="checkbox"/> Birthday <input type="checkbox"/> Closest Metro Area <input type="checkbox"/> Building <input type="checkbox"/> Floor <input type="checkbox"/> Office
<input type="button" value="Save Widget"/>	

PROFILE COMPLETION

Mobile number:	<input type="text"/>
City:	Chicago
<input type="button" value="Save"/>	

## Profile Picture (on-prem only)

Allows the current user to view and change his or her profile photo.

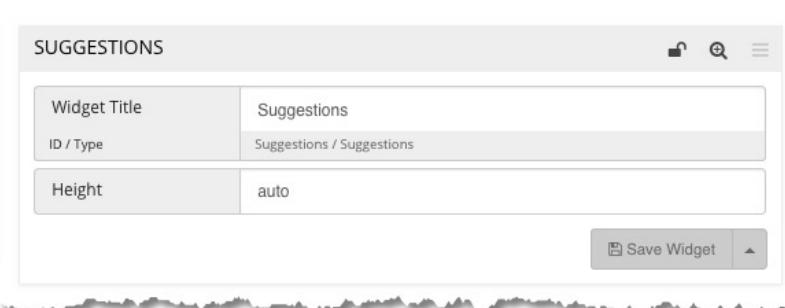

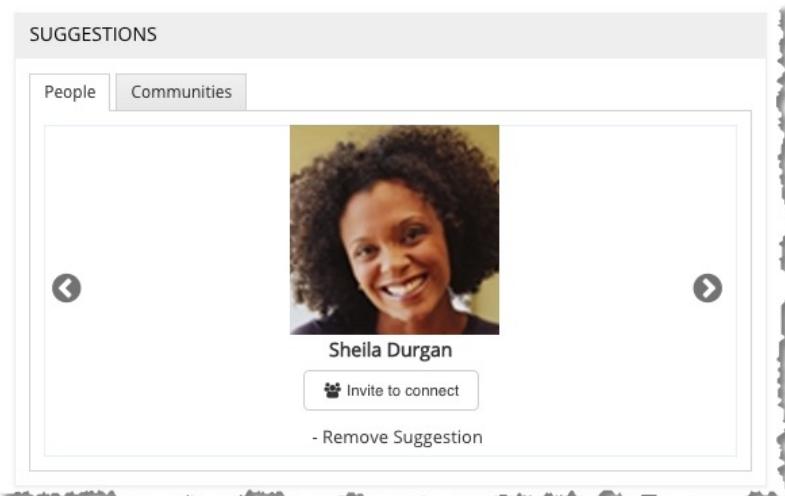

## Profile Tagging (on-prem only)

Displays and allows the current user to edit the tags associated with his/her own Connections profile.

## Suggestions (on-prem only)

Suggests both **People** and **Communities** that may be of interest to the user.

## Community-related widgets

### Activity Stream

Shows either the **user's** or one **community's** activity stream. The default tab can be set. When a community is NOT specified, provides a space to add a new status update.

ACTIVITY STREAM

Share Something: update your status or upload a file.

What would you like to share?

Height	auto
Show Sharebox	<input checked="" type="checkbox"/>
Show Navigation	<input checked="" type="checkbox"/>
Default Source	<input type="button" value="I Am Following"/> <input type="button" value="Status Updates"/> <input type="button" value="Discover"/>
Use Community	<input type="checkbox"/>

## Community Description

This works as well (and as poorly) as the standard Connections Community Description widget. Notice the funky wrap on the text around the photo below. It was specified correctly but the wrapping code is stripped from the photo as the widget is saved in Connections. Not surprisingly, ICEC shows it as it is in Connections.

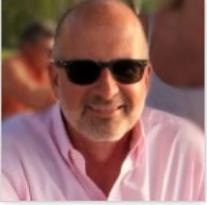

RECOMMENDATION: Do not try to wrap text around your images in this widget.

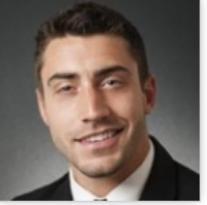

## Community Members

As you might expect, shows the members of a community. By default, it shows 5 to a page but that can be changed using the **page size** setting in the configuration (which is set to 4 in the images here).

## Clipping Widget

The ICEC Clipping widget lets you pull a part of an outside web page into your widget. As defined below, you provide the URL and a jQuery-like selector to define which part of the page should be pulled into the widget. The example here uses Reuters and always looks good.

Below is how it looks on the page:

News

Rising bond yields keep world stocks on shaky ground  
7:56am EST

---

Walmart makes push to sell online goods at \$10 and up to capture elusive e-commerce profit  
7:42am EST

---

Texas flood: U.S. oil exports pour into markets worldwide  
7:40am EST

---

Fed likely to continue raising rates: Kaplan  
5:44am EST

---

**North Korea says no U.S. talks planned at Olympics**

SEOUL, South Korea - North Korea has no intention of meeting U.S. officials during the Winter Olympics dampening hopes the Games will help resolve a tense standoff over the North's nuclear weapons program.

- How does Norway like its eggs? By the thousand..
- South Korean firms dream of returning North
- Sea change in relations? Not at this villa
- Complete coverage: Pyeongchang 2018

Setup details on the next page...

Below are the specifications used to set the widget up for the result shown on the previous page:

News

Widget Title	News
ID / Type	ExternalNews / Clipping

Continued on the next page....

Note the area for inserting your own CSS in the image on the previous page. Below is the CSS you'll need to paste into the **Custom CSS** area of the widget to get the results shown in this example:

```
.xccstyle .xccCropmark section.right-now-module{
    width:60%;
    float: left;
    padding-right: 5px;
}

.xccstyle .xccCropmark section .module-content {
    width:40%;
    float: left;
    padding-left: 5px;
}

/* *** Left Column *** */
.xccstyle .xccCropmark .columnLeft .photo a{
    width: 100%;
}

.xccstyle h3.story-title {
    margin: 0;
}
.story-title a {
    font-size: 17px !important;
    color: #000 !important;
}

.story-photo img {
    width: 100%;
}

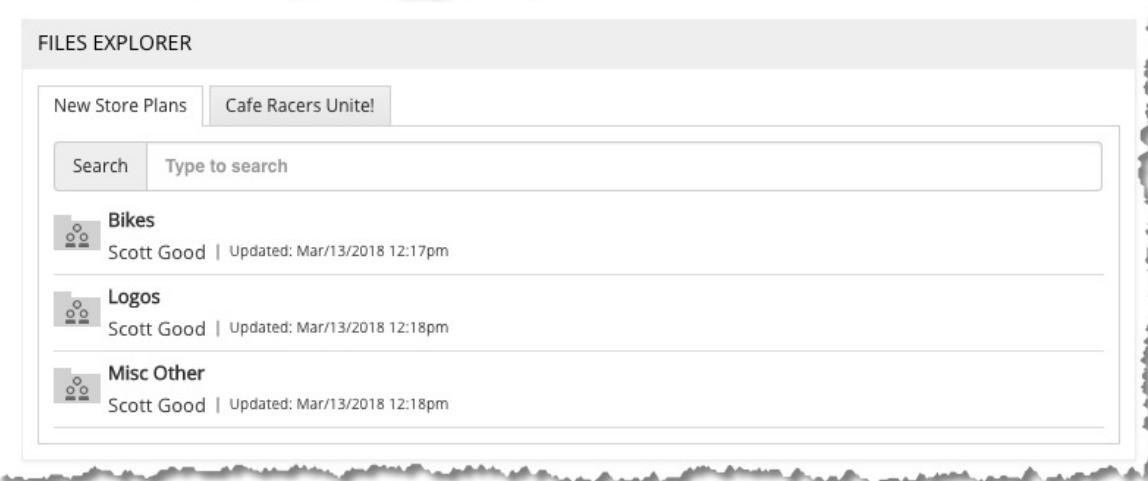

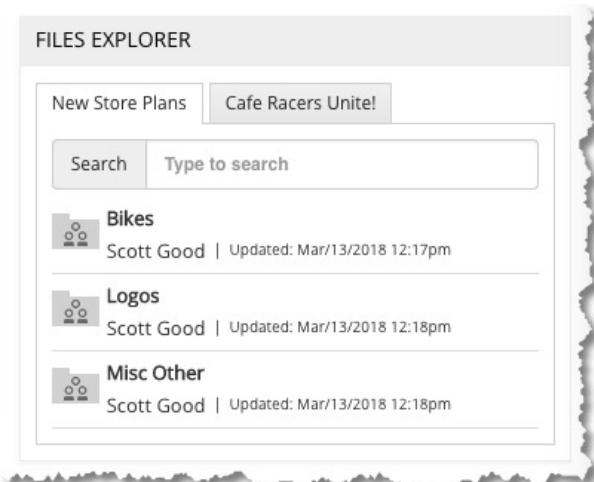

article.story {
    margin-bottom: 10px;
    border-bottom: 1px solid #ccc;
    padding-bottom: 9px;
}
```

## Files Explorer

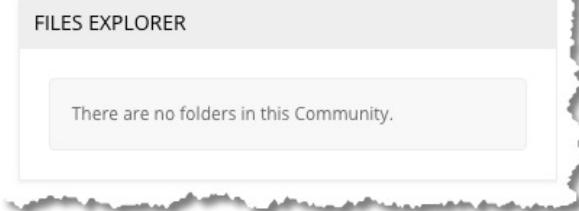

REQUIRES folders. Does not show files at the top level.

Optional SEARCH, as shown below, but this search is ONLY WITHIN THE CURRENT FOLDER, which makes it more of filter than a search.

DOES NOT show any files not in folders.

**NOTE: In Communities with files but no folders, you will see the message to the right AND ALL TABS WILL DISAPPEAR. The example shown here is the result of clicking on the "Cafe Racers Unite!" tab of the example shown above. Requires a full page refresh to get the tabs back.**

## Forum

Shows the main topic and its body content. Does not show responses. Supports multiple sources. Indicates questions with a question-mark icon.

The left screenshot shows the preview of the Forum widget. It displays three posts from the 'Cafe Racers Unite!' forum. The first post is from 'Cafe Racers Unite!' on Mar/13/2018 at 12:42pm, asking about maximizing power from a CB900. The second post is from 'Square Cafe Racers' on Mar/13/2018 at 12:33pm, looking for a Ducati for a build. The third post is from 'Square Cafe Racers' on Mar/13/2018 at 12:30pm, asking if a CB750 is a good starting platform for a newbie.

The right screenshot shows the configuration interface for the Forum widget. It includes fields for 'Widget Title' (set to 'Forum'), 'ID / Type' (set to 'Forum / Forum'), 'Height' (set to 'auto'), and 'Social' settings (with 'Likes and Comments' checked). There are two source configurations: 'Source 1' set to 'Square Cafe Racers' with 'Show Topics' set to 'All' and '# Items' set to '10'; and 'Source 2' set to 'Cafe Racers Unite!' with 'Show Topics' set to 'All'. A 'Save Widget' button is at the bottom.

Clicking on a main topic displays the full thread in a dialog:

A modal dialog box is shown, displaying a single forum topic from 'Scott Good' titled 'CB 750 like everyone else, or should I consider a different starting platform?'. The post was created on Mar/13/2018 at 12:30 pm. The content of the post is: 'I'm considering my first build. I know the CB750 is by far the most popular platform for cafe racers. Will I be too much like everyone else starting there, or is it better for a newbie?'. Below the post are two replies from 'Scott Good': one at 12:32 pm and another at 12:31 pm. The first reply suggests building a BMW or Ducati. The second reply encourages getting feet under you before tackling challenges. At the bottom of the dialog is a text input field for 'Add a Comment' and a 'Post Comment' button.

## HTML Widget

Allows the developer to write custom HTML, including CSS and even some JavaScript.

Widget Title	
ID / Type	Header / HTML
Height	auto

Code (Full-Screen: Ctrl+F11)

```
1 <div style='position:relative;height:30vw;overflow:hidden;'>
2   <img src='/xcc/rest/public/custom/cova_flu-season.jpg' style='width:100%;margin-top:-140px;' />
3   <div style='position:absolute;top:9vw;left:2vw;padding:20px;background:rgba(0,0,0,0.3);font:36pt "Helvetica Neue", "Roboto Thin", Helvetica, Arial, sans-serif;color:white; font-weight: 200;'>
4     It's <span style='font-weight:800;'>flu season</span> in Virginia!
5   </div>
6 </div>
```

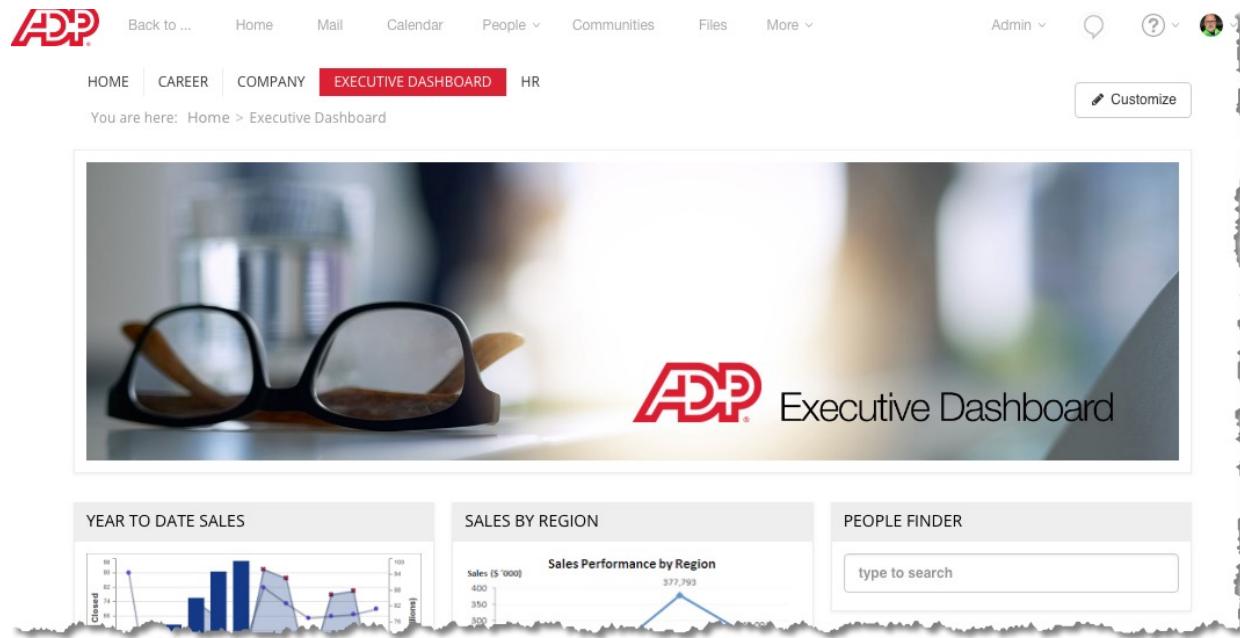

435 B

Save Widget

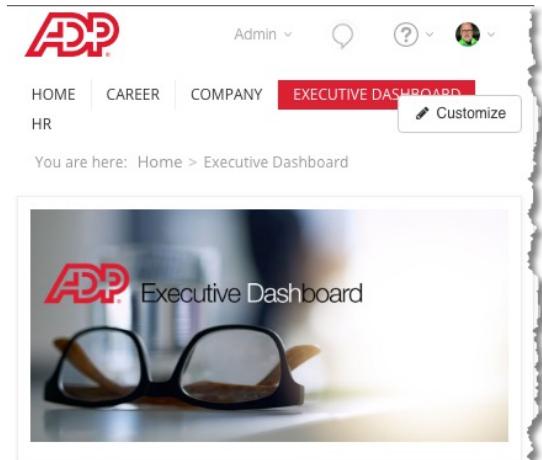

HTML & CSS for the example above (note that the image is stored with ICEC resources):

```
<div style='position:relative;height:30vw;overflow:hidden;'>
  <img src='/xcc/rest/public/custom/cova_flu-season.jpg'
style='width:100%;margin-top:-140px;' />
  <div
style='position:absolute;top:9vw;left:2vw;padding:20px;background:rgba(0,0,0,
0.3);font:36pt "Helvetica Neue", "Roboto Thin", Helvetica, Arial, sans-serif;
color:white; font-weight: 200;'>
    It's <span style='font-weight:800;'>flu season</span> in
Virginia!
  </div>
</div>
```

## HTML Widget Responsive Example

The screenshot shows the ADP Executive Dashboard mobile view. At the top, there's a navigation bar with links for Home, Mail, Calendar, People, Communities, Files, More, Admin, and a user profile. Below the navigation is a breadcrumb trail: You are here: Home > Executive Dashboard. A "Customize" button is also present. The main content area features a large background image of a pair of glasses. Overlaid on this are three widgets: "YEAR TO DATE SALES" (a dual-axis chart showing opportunities closed and revenue), "SALES BY REGION" (a line chart showing sales performance by region with a value of 377,793), and "PEOPLE FINDER" (a search input field). The entire dashboard has a torn paper effect around its edges.

The screenshot shows the ADP Executive Dashboard large view. It has a similar layout to the mobile view but with more content. The top navigation bar includes HOME, CAREER, COMPANY, EXECUTIVE DASHBOARD (which is highlighted in red), and HR. The breadcrumb trail shows: You are here: Home > Executive Dashboard. The "Customize" button is visible. The main content area includes the same three widgets as the mobile view: "YEAR TO DATE SALES", "SALES BY REGION", and "PEOPLE FINDER". The background image of glasses is larger and more prominent. The overall design is clean and professional.

This example uses two different images.

The larger version is  $1639 \times 528\text{px} = \sim 3 : 1$

The mobile version is  $1083 \times 528\text{px} = 2 : 1$

See the next page for the CSS.

**The HTML & CSS for the responsive example on the previous page:**

```
<style type='text/css'>
    div.mainHeaderContent {
        height: 23vw;
        min-height:200px;
        background:
url(/xcc/rest/public/custom/ADPExecDashboardHeader.jpg) no-repeat;
        background-size: cover;
        background-position-y: -30px;
        width: 100%;
        position: relative;
    }
    div.mainHeader {
        width:20vw;
        position: absolute;
        top: 1vw;
        left: 50%;
        margin-left: -10vw;
    }

    div.mainHeaderContent img.logoImg {
        position: absolute;
        top: 1vw;
        left: 1vw;
        width: 8vw;
    }
    div.mainHeaderContent h1 {
        font-family: 'Rokkitt',sans-serif;
        line-height: 42px;
        background-color: #0083c1;
        font-size: 50px;
    }
    @media (max-width:700px) {
        div.mainHeaderContent {
            height: 45vw;
            background:
url(/xcc/rest/public/custom/ADPExecDashboardHeader_Narrow.jpg) no-repeat;
            background-size: contain;
        }
    }
</style>
<div class='mainHeaderContent'>

</div>
```

## Ideation Blog

Shows most recent or selected entries. Allows voting without opening (for those you can see). Shows body as well as title for those that have it. Better in narrower columns.

IDEATION BLOG

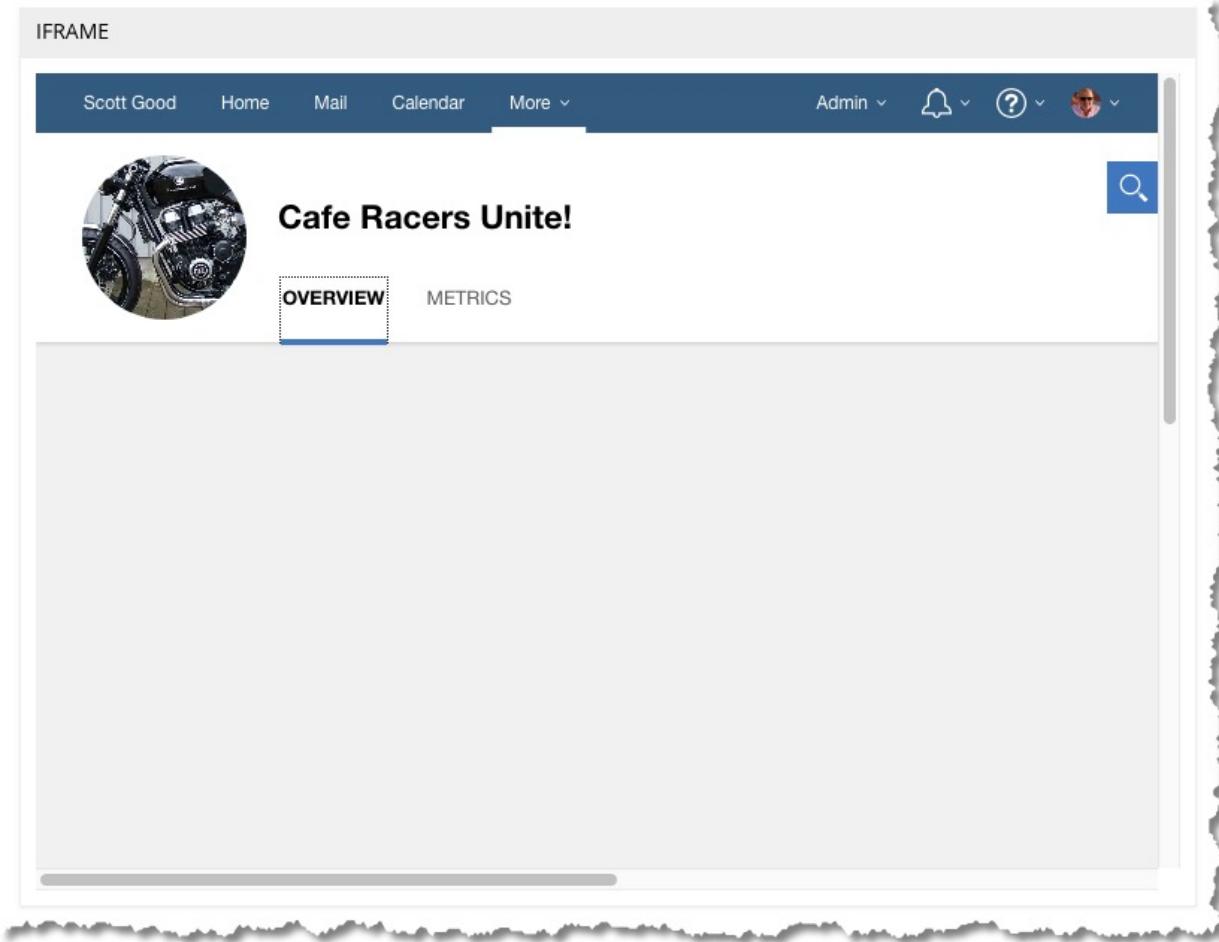

0 <input checked="" type="checkbox"/> Vote	Make this an all-Honda club ...
1 <input checked="" type="checkbox"/> Unvote	How to build your own rear-sets ...
0 <input checked="" type="checkbox"/> Vote	Provide hands-on learning experiences for members ...
1 <input checked="" type="checkbox"/> Unvote	Monthly meetings? We should all meet somewhere for coffee and food. Hopefully, down a great road somewhere....  <a href="#">more ideas</a>

## IFrame

Assuming there is an available proxy server, can show anything that allows being iFramed (for instance, Google does not allow it).

## Important Links

Shows Bookmarks marked "Add to Important Bookmarks." Supports multiple sources but on separate tabs. Clicking any link opens a new window.

## Links (on-prem only)

Shows links stored in one or more communities

A screenshot of the "LINKS" configuration interface. At the top, there are input fields for "Widget Title" (set to "Links") and "ID / Type" (set to "Links / Links"). Below these are settings for "Height" (set to "auto"), "Search" (unchecked), "Sort by" (set to "Name"), and "Personalize" (unchecked). A button labeled "Add Channel" is present. A modal window titled "Channel 1" is open, showing configuration for a channel named "Bank News" from "TD Bank News". It includes options to "Show Posts" (with "All" selected) and settings for "# Items" (10) and "# Per Page" (5). At the bottom of the configuration area is a "Save Widget" button.

Widget Title	Links
ID / Type	Links / Links
Height	auto
Search	<input type="checkbox"/>
Sort by	Name
Personalize	<input type="checkbox"/>

Add Channel

Channel 1

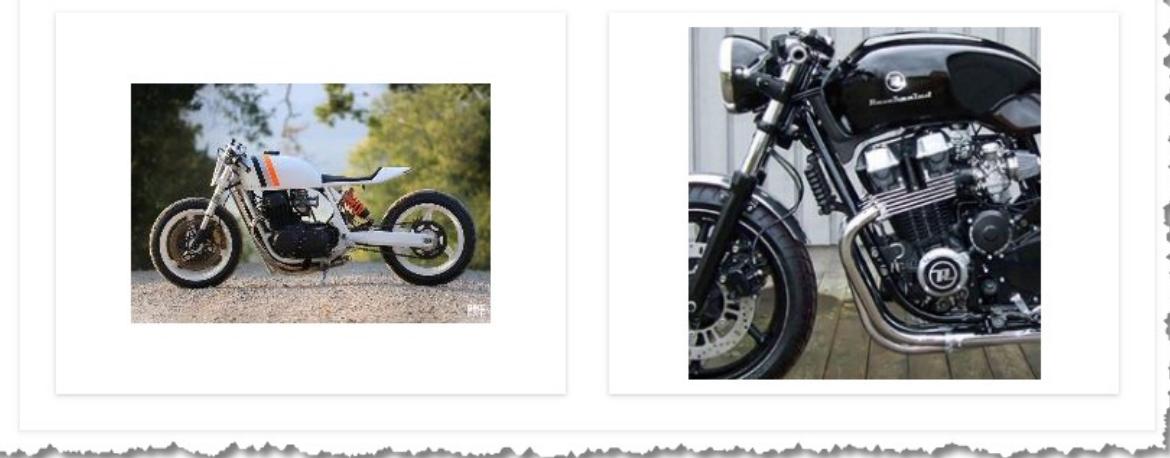

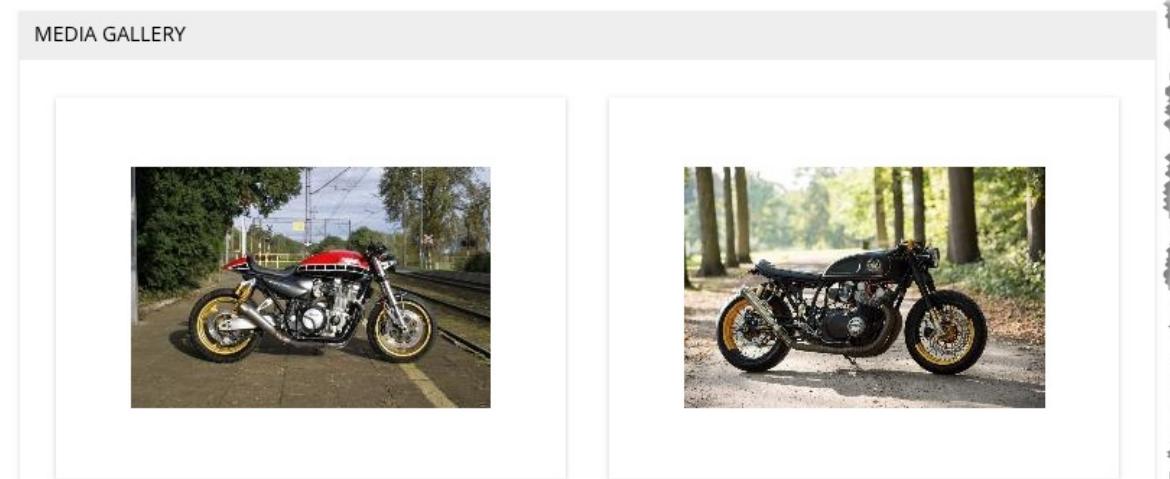

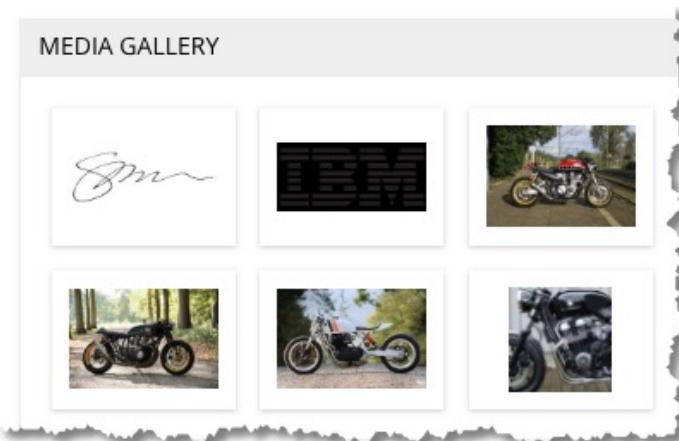

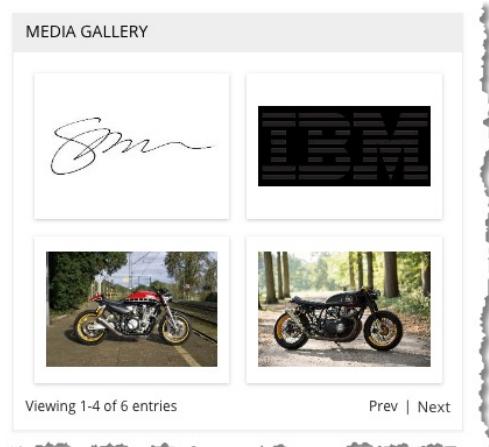

Name	Bank News
Source	TD Bank News
Show Posts	All <input checked="" type="radio"/> Selected <input type="radio"/>
# Items	10
# Per Page	5

Save Widget

## Media Gallery

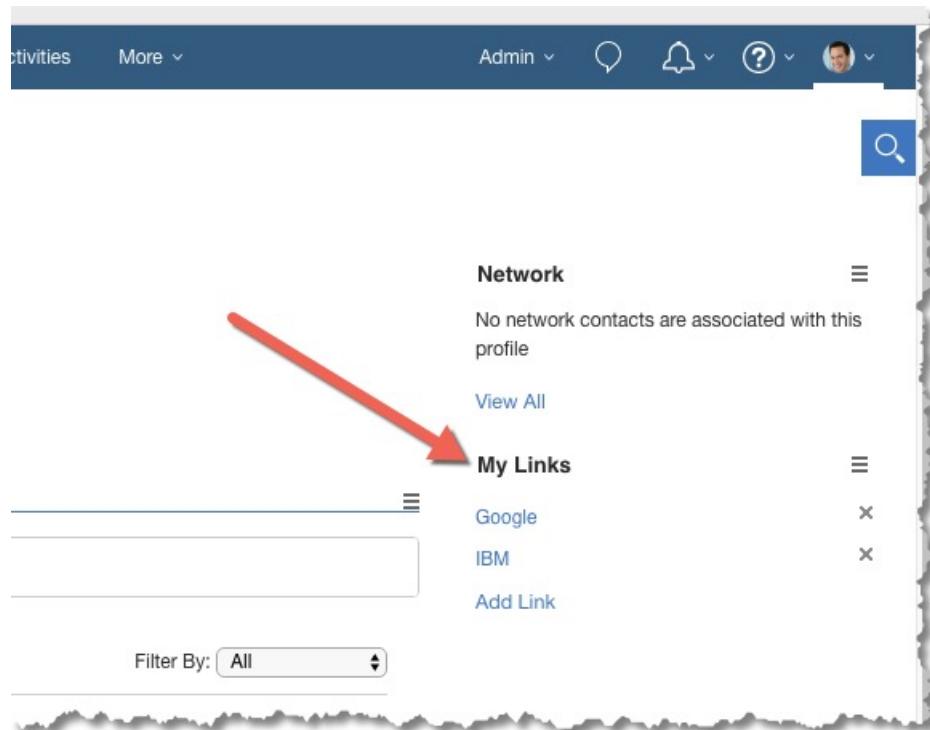

Shows only image files (i.e., does not show files such as .css).

Does adjust files to fit display area. Grids of 4- or 9 images are available.

## My Links

Displays links set up in the user's Profile page...

A screenshot of a software interface. At the top, there is a dark blue header bar with various icons and text elements. Below this, the main content area has a light gray background. On the left side, there is a sidebar with a search bar at the top. The sidebar contains two sections: 'Network' and 'My Links'. The 'Network' section is currently active, showing the message 'No network contacts are associated with this profile' and a 'View All' link. The 'My Links' section is shown below it, containing a list of links: 'Google' and 'IBM', each with a delete icon ('x') to its right. At the bottom of the sidebar, there is a 'Filter By:' dropdown menu set to 'All'. A red arrow points from the text 'It displays like this:' to the 'My Links' section in the screenshot.

It displays like this:

A screenshot of a simplified interface titled 'LINKS'. It features a light gray header and a white content area. Inside the content area, there is a list of links: 'Google' and 'IBM', each preceded by a small blue circular icon with a white arrow pointing right. The entire interface is enclosed in a decorative border with a wavy pattern.

## My Notes

Creates Activity To-Dos for the current user.

**NOTE: You must include an Activityname value** (even though the widget doesn't require it). Otherwise your To-Dos will be created in Connections but not displayed after refreshing the page or widget.

The left screenshot shows the 'MY NOTES' interface with three notes listed:

- Find speaker for April meeting (Deadline: Mar/22/2018 | Created: Mar/13/2018)
- Pick up rebuilt carburetors (Deadline: Mar/26/2018 | Created: Mar/13/2018)
- Confirm meeting location for April (Deadline: Mar/16/2018 | Created: Mar/13/2018)

Sort by: created      Completed show

The right screenshot shows the 'Widget Title' set to 'My Notes' and 'Activityname' set to 'MyActivityName'. A red arrow points to the 'Activityname' field.

Given an activity name value, this app creates an activity called "Notes-App: *your activity name*." Inside that activity, it creates To-Do items for each Note added in the app. Shown below are the To-Dos added when the above notes were created:

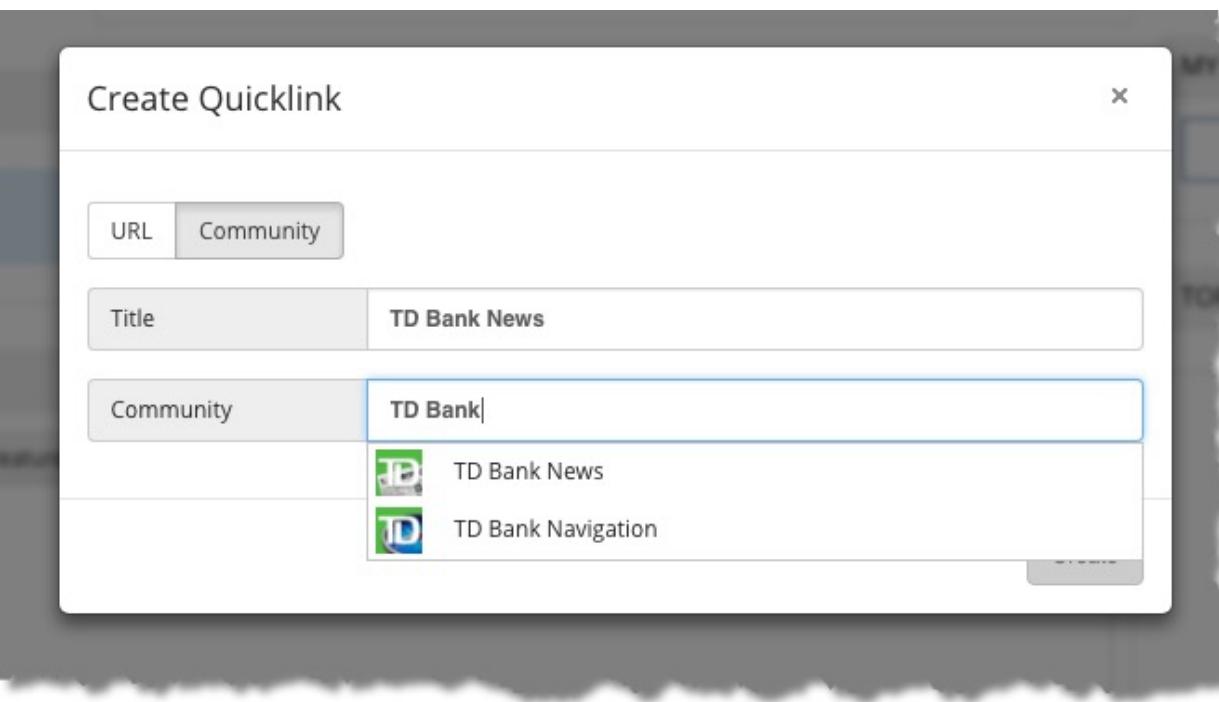

The screenshot shows the 'Activities' page with the 'ACTIVITIES' tab selected. A yellow box highlights the activity title 'Notes-App: MyActivityName'. Red arrows point from the notes in the 'My Notes' configuration to the corresponding To-Dos in the 'Activities' page. The To-Dos are:

- Confirm meeting location for April Due Friday
- Pick up rebuilt carburetors Due Mar 26
- Find speaker for April meeting Due Mar 22

Other visible sections include 'Activity Outline', 'Recent Updates', 'To Do Items', 'Trash', 'Members', and 'Sections'.

## My Quicklinks (on-prem only)

Shows links entered into the widget. May be either URLs or Communities (or both). Communities support type-ahead searching. Quicklinks are personalized...you see yours, I see mine. They are not shared.

## Navigation

Shows wiki navigation links such as those used in the ICEC navigation. Configuration points the user to a particular wiki, so doesn't have to be the same as ICEC main. Options for left or right determine where the sub-levels appear. Shown below is RIGHT oriented. Allows personalization.

The image displays two views of a navigation configuration interface. The top view shows a preview of the navigation bar with items like HOME, MEMBERSHIP, MEETINGS, BY NAME, and BY BIKE. The bottom view shows the configuration settings for the navigation widget, including fields for Widget Title (Navigation), ID / Type (Navigation2 / Navigation), Height (auto), Orientation (Right selected), Personalize (unchecked), Source (Site Navigation), Show Page (All selected), and a Save Widget button.

Widget Title	Navigation
ID / Type	Navigation2 / Navigation
Height	auto
Orientation	Left Right
Personalize	<input type="checkbox"/>
Source	Site Navigation
Show Page	All Selected

Save Widget

## Pinned Files

Shows files you have pinned. Pinning is not an option in Communities, but you can pin files you've uploaded to your own personal Connections Files repository, as well as files shared with you from others' personal Files.

The screenshot shows a 'PINNED FILES' section with two items:

- Porsche919\_400Square 2.jpg** by Scott Good | Updated: Mar/14/2018 09:03am
- HomePage.jpeg** by Frank Adams | Updated: Feb/08/2018 02:50pm

At the bottom, there is a link: [View all \(2 documents\)](#).

## Popular Content (on-prem only)

Shows the most popular content of several types. No settings for this.

The screenshot shows a 'POPULAR CONTENT' section with the following navigation tabs:

- Most visits Wiki
- Most liked Wiki
- Most visits Bookmarks
- Most liked Blogs
- Featured Blogs

The main content area lists the following popular items:

- TD Bank Navigation
- ADP Navigation (on-prem)
- HR and Benefits
- DWH Company
- TD Careers

## Saved Search

This widget can act either as a cross-Connections search OR automatically display the results of a saved cross-Connections search.

### Normal Searching...

Simply adding this widget to the page presents the user with a search field. You have some control over how many (and how) the results are displayed, as shown below.

SAVED SEARCH

new material

ID / Type	SavedSearch2 / Saved Search
Height	auto
URL	
# Items	5
# Per Page	10

Save Widget

### Saved Searches...

Alternatively, you can save a search and have it performed automatically whenever the widget is refreshed. To do this, first do a regular Connections search outside of ICEC:

Racer Motorcycle X XCC Self Study Guide Scott Good per...

Admin ▾

new material

All Content | My Files

Sorry, there are no results for this search. Try a different word or more general term.

When you hit ENTER and see the results of your search (as shown below) copy the URL from the page:

A screenshot of a web browser window showing search results. The address bar at the top displays the URL: <https://apps.na.collabserv.com/search/web/search?query=new+material&scope=allconnections>. A red arrow points to this URL. The main content area shows a search for "new material" with results under "All Content". One result is visible: "IBMConnectionsClientOverview-Short.pptx" by Scott Good, posted on Mar 10, with tags client-presentation. There are navigation links for "Previous | 1 | Next".

Paste the above URL into the Saved Search widget:

A screenshot of the "SAVED SEARCH" configuration dialog. It contains the following fields:

Widget Title	Saved Search
ID / Type	SavedSearch / Saved Search
Height	auto
URL	<a href="https://apps.na.collabserv.com/">https://apps.na.collabserv.com/</a>
# Items	5
# Per Page	10

At the bottom is a "Save Widget" button.

The result is whatever comes back from the search (as shown below). NOTE that there is no ability for a user to do his or her own searching in this configuration.

A screenshot of the search results displayed in the "SAVED SEARCH" widget. The results are:

- Mar/10/2018 12:40pm  
IBMConnectionsClientOverview-Short.pptx
- Feb/27/2018 12:35pm

## Static Content – Wiki

Shows a single entry from the specified wiki. Either the most recent entry or one that has been selected. Does not resize images that have sizes spec'd in them (the one below was specified in image properties to 400px wide and it's being cut off on the right).

WIKI

**Lorem Ipsum, or Lipsum for short, is simply dummy text of the printing and typesetting industry.** Lipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only four centuries, but now the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lipsum. ...

Contrary to popular belief, Lipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintock, a Latin professor at Hampden-Sydney College in Virginia, looked

## Teaser

Shows image, headline, teaser copy, and links to somewhere else when clicked.  
Allows some HTML in the caption and abstract sections.
